

## **AERO NAV LABORATORIES ENVIRONMENTAL SIMULATION TESTING TECHNOLOGY SEMINAR**

- Purpose:** The purpose is to present the basic principles of environmental simulation test technology. The seminar is designed to enable the attendees to become aware of the nature of the various test techniques and to learn how to specify the customer requirements.
- Content:** The seminar consists of a lecture with both stills and video clips to illustrate the particular topic being presented. It will give attention to those particular requirements which the customer must address when submitting a request for a quotation for testing.
- Location/Duration:** The seminar may be presented at Aero Nav Laboratories or at a site convenient to the company or organization. There is no charge for the seminar.  
The duration of the seminar is approximately one hour plus a question and answer period. The content and length of the seminar may be modified to suit the attendees needs.
